The rapid and vast changes we are beginning to experience in both our personal and professional lives call for a drastic shift in our thinking patterns and the way in which every industry will need to conduct business in the near future. Not only will business models in each and every trade need to transform in order to meet the growing needs and demands of consumers, but – more importantly – we will need to make a shift in the way we see and experience the world.

We currently live in a world governed by unprecedented technological advances – artificial intelligence, 3D printing and self-driving cars to mobile supercomputers, robotics and nanotechnology – that are all evidence of the significant change that is starting to happen around us right now.

We are on the brink of the Fourth Industrial Revolution that will no doubt change the way humankind lives, works and relates to one another. We are experiencing change at a speed unlike anything the world has experienced before, that compels us to live and create realities that were previously unthinkable.

As a means of contributing to the overall growth of the global market and anticipating future shifts in the way we have to do business, Enterprises University of Pretoria (Enterprises UP) provides specialised training programmes and short courses for skills development as well as research and advisory services for critical business insights to both our clients and individuals in South Africa and beyond.

What better way to remain on top of global changes in every walk of life and industry than through a partnership with a leading training and research provider that is backed by a solutions-driven approach and experts from the University of Pretoria.

We not only ensure that you increase productivity and enhance service excellence in your line of business, but also that you continuously engage in groundbreaking knowledge transfer in an ever-changing world by always shifting knowledge to insight.
Our solutions present a multifaceted value proposition aligned with organisational objectives, personal growth and skills development goals – either as a combination of Training Solutions and Research Solutions or as distinct solutions on their own. This also means that your company can optimise on B-BBEE scorecard points with a combination of our offerings that support the following outcomes:

**1. Work readiness development.**
Let entry-level employees acquire the right skills to help them integrate into the world of work more easily.

**2. Workplace Skills Plan (WSP) activation.**
Develop capacity and equip designated employees with professional skills aligned with industry needs.

**3. Community engagement.**
Ignite change in communities through experiential training and innovative business opportunities.

**4. Enterprise and supplier development.**
Invest in small business entities and start-ups that aspire to be more effective, efficient and sustainable.

**RESEARCH SOLUTIONS**

We provide a service offering that spans 50 plus areas of functional expertise and capability. Within each of these areas the total service offering is well balanced between applied research, advisory services and specialised business units. Most of our projects are highly customised and the solutions contained within each project draws on the latest best practice as informed by science and evidence.

**WHY PARTNER WITH US?**

- **A single point of entry for all training, research and advisory services.**
- **Access to all knowledge outputs from the University of Pretoria.**
- **Personalised services to achieve unique business and professional development goals.**
- **Innovative solutions for targeted training and critical business insight.**
- **An extensive international footprint spanning six continents.**
- **Draw from leading industry experts and South Africa’s finest thought leaders.**

**SOLUTIONS-DRIVEN APPROACH**

Make business decisions informed by scientific evidence.
Science and scientific methods are embedded within our total solution offering.

Implement solutions that are shaped by and applicable to real-world challenges.
The strong symbiotic relationship between science and application enables us to generate solutions that are both innovative and practical.

Enrich your perspective by allowing multidisciplinary project teams to generate 360 degree insights.
We deploy various knowledge experts on the same project to generate enriched perspectives and diverse views.

Be a beneficiary of our creative journey with new ideas and solutions.
We are a breeding ground for new ideas, solutions and innovations – and only after they have been tested and applied do we put them into practice.

**COMPANY OVERVIEW**

Our solutions present a multifaceted value proposition aligned with organisational objectives, personal growth and skills development goals – either as a combination of Training Solutions and Research Solutions or as distinct solutions on their own. This also means that your company can optimise on B-BBEE scorecard points with a combination of our offerings that support the following outcomes:

- **Work readiness development.** Let entry-level employees acquire the right skills to help them integrate into the world of work more easily.
- **Workplace Skills Plan (WSP) activation.** Develop capacity and equip designated employees with professional skills aligned with industry needs.
- **Community engagement.** Ignite change in communities through experiential training and innovative business opportunities.
- **Enterprise and supplier development.** Invest in small business entities and start-ups that aspire to be more effective, efficient and sustainable.

Business Management and Entrepreneurship

As we are seeing more and more updated models of work (such as freelancing and remote work) become the norm, the 21st century is driving teams to be more flexible, adaptive and responsive to quick changes in the work environment.¹ This also means that companies and other organisations need to start looking beyond the “not my problem” mindset when it comes to skills acquisition, but take the upskilling (and even re-skilling) of their employees much more seriously. Not only will this provide in-depth insights into employment opportunities, but also help to encourage and foster further high-impact intrapreneurs all round.

Just as entrepreneurs are equipped with creative ideas, visions of the future and a willingness to challenge the status quo, empowered employees can also play a vital role in society and the global economy.² Through our range of Business Management and Entrepreneurship products and services, we can provide you with concrete solutions to drive change by giving you access to a one-stop-shop to make global business and policy practices more transparent, inclusive and sustainable. From business processes and models to business rescue and start-ups, we have you covered with the most updated practices for a proactive operational environment.

90%
The private sector’s contribution to the world’s job market.³

35%
of the skills demanded for jobs across industries will change by 2020.⁴
Change Management

The Change Management short course focuses on the competencies required to ensure successful change in an era where the challenges of change require managers to apply a holistic approach in change management. Research has highlighted various reasons for change failure, including failing change management competence, resistance to change, the inability of managers to deal with resistance, poor strategic alignment, a lack of leadership visibility and support, as well as poor transition leadership. During this course, you will learn to align yourself with best practices in managing successful change and how to lead through productive influence in times of imminent change.

Ethics in Business and Professions

The Ethics in Business and Professions workshop will equip you with the knowledge and skills required to understand ethics in business and professions, as well as to create an awareness of formal ethics management or governance structures that can be implemented in organisations in order to build a sound ethical organisational culture. This workshop can be customised for different professionals, including accountants, auditors, lawyers, advocates, engineers, medical practitioners and individuals who are involved in governance and ethics in their organisations. The workshop will also benefit human resource practitioners, governance, ethics or integrity unit staff, as well as administrative staff.

See also: Financial Management and Taxation

Patent Law

The short course in Patent Law focuses on the protection for new inventions whereby you will discover which inventions are eligible to be patented, when and how a patent originates, what a patent entails, how long a patent endures and who owns it. You will also gain know-how of circumstances where inventions may be used by others who do not own the patent and when infringement of a patent occurs. The course also looks at remedies available to deal with these infringements and you will gain invaluable knowledge of international treaties and how they influence patents in South Africa.

Strategic View on B-BBEE

The Strategic View on B-BBEE workshop focuses on broad-based black economic empowerment in a commercial context and facilitates strategic thinking and decision making in your organisation’s approach to implementing it successfully. The workshop is designed to assist you with a practical understanding of the different relevant pieces of legislation, including the B-BBEE Amendment Act, the Code of Good Practice, the Preferential Procurement Policy Framework Act (PPPFA) and the Preferential Procurement Regulations. B-BBEE should be seen as a tool that can be used to contribute to long-term sustainability and job creation, and to address the country’s growth and poverty challenges.

BUSINESS MANAGEMENT AND ENTREPRENEURSHIP

BUSINESS MANAGEMENT SHORT COURSES

Business Management

The Business Management short course will introduce you to the fundamentals of business management, including the techniques, processes and procedures for sound business acumen. You will not only gain theoretical and practical knowledge of basic managerial competencies, but you will also develop the requisite skills for more effective workplace performance and enhanced organisational productivity. The course also gives you a closer look at developing relevant marketing material, interpreting organisational performance with financial ratios, drawing up income statements and balance sheets, identifying and optimising value-adding activities, as well as strategising on the basis of the results of micro- and macro-environmental analyses.

Customer Experience Management

The Customer Experience Management short course specifically focuses on the development and execution of customer experience management (CEM) measurement, strategies and implementation, and will provide you with a deeper understanding of the essentials of CEM. Organisations are increasingly recognising that customer retention, growth and profitability rely heavily on the quality of customers’ interaction with their business environments. This course is designed to address one of the fastest growing needs in modern organisations and aims to help you increase customer retention, growth, loyalty and profitability where you will soon be on your way to become a customer experience specialist or manager.

Supply Chain Management and Logistics

Contract Management

The short course in Contract Management is ideal if you seek to acquire the necessary practical skills in effectively managing and administrating contracts for goods and services. Contract management refers to the process of systematically and efficiently managing contract creation, execution and analysis for the purpose of maximising financial and operational performance while minimising risk. Whether it is through great interpersonal and negotiation skills, or the ability to establish and maintain powerful business relationships, this course will equip you with an in-depth understanding of the industry and business in which you operate as contract or business manager.

Customer Experience Practice

With the short course in Customer Experience Practice, you will be able to bridge the gap between theory and practice in the customer experience and service delivery arena by focusing on the implementation of customer experience principles. This course will ultimately enable you to identify needs and then develop and implement customer experience programmes that are relevant to your respective industry and/or workplace. Customer experience management (CEM) has gained popularity in recent years as an effective mechanism for retaining and promoting client loyalty, but many businesses are still struggling with the implementation of CEM principles in their specific business environments.

The Fraud Risk Management short course provides you with a full awareness of fraud and corruption malpractice in support of developing fraud risk management strategies. As the extent of fraud and corruption is a major concern throughout the world, professionals at all levels of management in all organisations, industries as well as government departments must be vigilant. Internationally, steps have been taken to combat fraud and corruption on a broad front. This includes the establishment of international protocols and the necessary legal frameworks. This course will enable you make the link between these protocols and frameworks to implement organisation-specific strategies.
Online Course in eBusiness and eCommerce

The Online Course in eBusiness and eCommerce focuses on optimising customer relationship management in an online environment by examining eBusiness and marketplace models, eBusiness strategies, eMarketing and procurement in some detail. The initial investment for an eBusiness start-up is generally lower than starting a traditional business, and with technology becoming more advanced and easier to obtain, the barriers to opening a business have been significantly reduced or even removed. Because buyers and sellers can transact at any time and from anywhere, eBusiness and eCommerce not only provide cost-saving advantages, but also make goods and services accessible on a global scale.

Outcomes-Based Monitoring and Evaluation Implementation

The Outcomes-Based Monitoring and Evaluation Implementation short course will provide you with a practical and theoretical framework for understanding and implementing the monitoring and evaluation (M&E) process in the operational business environment. While it may be biased towards developmental work, it nevertheless provides knowledge that is especially suited to the aim of M&E programmes, projects and performance in a bid to generate the desired results in an organisation. The course takes a closer look at concepts of M&E, problem analysis, results-based management, M&E readiness assessment, frameworks, selecting indicators, outcome statements, data-related considerations, techniques for monitoring and analytical categories of evaluation.

Process Management for Business Operations

The short course in Process Management for Business Operations will provide you with an essential overview of the art and science of managing a business by exposing you to the basic concepts, tools and skills that are required (as well as the difficulties experienced) when introducing business process management into an organisation. Businesses experience constant pressure from competitors that forces them to continuously evolve, redesign, implement and manage innovative business processes. The course takes a detailed look at the concept of model-driven architectures, modelling tools, process analysis and design, as well as process optimisation, re-engineering, change management and organisational buy-in.

Supply Chain Management and Logistics

Process Modelling for Business Operations

The Process Modelling for Business Operations short course will introduce you to best-practice industry process modelling standards in order to equip you with a solid understanding of practical tools and techniques for business processes modelling in preparation of analysis and improvement of business process performance. Business process modelling is essential to business management success and documenting all the processes aids communication throughout an organisation. This has always been a key aspect of quality management programmes, business process re-engineering and ongoing improvement approaches. The course emphasises the importance of creating aligned viewpoints and context for process modelling in the business environment.

Programme in Office Management for Administrators and Executive Assistants

The Programme in Office Management for Administrators and Executive Assistants will provide you with the requisite advanced skills in your secretarial role to perform your daily responsibilities more effectively. The programme will assist you in developing capabilities to work well under pressure, successfully multitask and effectively coordinate tasks in a fast-paced work environment. During this programme, you will not only gain the skills and knowledge required to become an efficient office assistant by learning office strategies, but you will also become expertly proficient in prioritising daily tasks, keeping a highly organised work environment and completing tasks in a shorter period of time.

See also: Marketing, Communication and Languages

Total Quality Management

The short course in Total Quality Management will introduce you to contemporary tools and techniques in quality control that will enable you to articulate and implement quality improvement processes in the workplace in line with the total quality management philosophy. In today’s world, customer satisfaction and competitiveness are a function of quality levels, and individuals with the capacity to successfully implement total quality management are becoming indispensable assets to any organisation. Total quality management is based on the principle that every member of staff must be committed to maintaining high standards of work in every aspect of an organisation’s operations.

BUSINESS RESCUE
Agricultural Entrepreneurial Management

The Agricultural Entrepreneurial Management short course presents you with a unique learning experience as emerging agri-entrepreneur to equip you with requisite skills for personal entrepreneurial development. The course focuses on a clear differentiation between the entrepreneurial farmer and the small-scale farmer and also introduces you to the impact of agri-entrepreneurship on the southern African socioeconomic environment. The effective and efficient management of the agri-business is discussed, as well as functional areas of general management. After completing the course, you will be able to understand the complexities of the agricultural value chain to conduct business and establish an entrepreneurially orientated agri-business.

Bioentrepreneurship

The Bioentrepreneurship short course focuses on the application of business principles aimed at entrepreneurs in the biotechnology sector and anyone who may have an interest in aspects related to bioentrepreneurship. Biotechnology is the application of science and technology to living organisms for the production of knowledge, goods and services. Biotechnology is considered a major new commercial activity in the innovation sphere following the possible decline of activity in the information and communication technology sector. Through their involvement in biotechnology, entrepreneurs have an unparalleled opportunity to develop and commercialise new products and services, and to develop and grow their own businesses.

Advanced Course in Bioentrepreneurship

The Advanced Course in Bioentrepreneurship takes you as aspirant bioentrepreneur to a more progressive level of practical knowledge and application in the biotechnology sector with a specific focus on the pharmaceutical and manufacturing industries. Although small, the South African science and technology sectors have recently received much support from government through the development of new entities and start-up companies aimed at providing financial and other support to would-be technology entrepreneurs as well as through intellectual property generated from publicly funded research. This is a move towards a knowledge economy and the development of stronger science and technology sectors as priority.

Communication and Sales Toolkit for Start-up Companies

The Communication and Sales Toolkit for Start-up Companies short course is aimed at coaching members of start-up companies in practical yet effective communication and sales tools (as instruments of engagement) that can be used to present products or services to prospective clients with considerable confidence and higher levels of engagement. The engagement with prospective clients is about more than mere promotional meetings, and during this course you will be introduced to the tools, techniques and skills that are important to affect an impactful encounter driven by appropriate presentation strategies and promotional tools that can be used to your advantage.

See also: Marketing, Communication and Languages
The eSkills for Entrepreneurs short course provides you as an entrepreneur the opportunity to better understand technology and see how it can assist you in growing your business. The course will help to optimise your communication skills through technology, not only with your employees, but also with your suppliers and customers. During the course, you will also start to understand the benefits of social media and how it can be used to help a business grow. This course is a great way for entrepreneurs and small business owners to start to explore the important role technology can play in their business.

See also: Information and Communication Technology

Finance in Small Businesses: Are You Charging the Right Price?

The short course Finance in Small Businesses: Are You Charging the Right Price? is critical if you are a small business owner or senior manager responsible for the financial decision-making process – and need informed and accurate information to price your goods and services appropriately. Neglected by many role-players in the small business and entrepreneurship ecosystem, business owners are often not clear on the right price to charge. This course will equip you with the skills and knowledge to make good pricing decisions by understanding your financial goals, classifying different costing models, ensuring a return-on-investment and supporting sustainable business practices.

See also: Financial Management and Taxation

Funding for Small Businesses: How to Access Funding

The short course in Funding for Small Businesses: How to Access Funding will help you as small business owner or senior manager with the practical skills and knowledge to be able to write high-quality tenders and proposals for acquiring the necessary funds and support to get your new business and/or products/projects off the ground. The course specifically addresses the scope and methodologies of proposal writing by focusing on the common prerequisites for funding projects, private-sector versus public sector products, how to access these products, as well as the essential requirements usually demanded by funding companies’ specific proposal and tender processes.
Small Business Sales: How to Close the Deal

The short course in Small Business Sales: How to Close the Deal will aid you as a small business owner (or senior manager responsible for closing sales) to achieve better sales results through the requisite sales process skills and awareness. During the course, you will gain invaluable skills in gathering market information, identifying new prospects and opportunities, segmenting your particular target market and designing a unique value proposition that will close the deal time and again. You will also come to understand the sales process more comprehensively and follow it with precision in order to achieve the best results going forward.

Starting a Business: Financial Management

The Starting a Business: Financial Management workshop specifically focuses on introducing you to the concepts and principles of entrepreneurship and small business management, with an emphasis on financial management of small businesses. If you have never operationalised your business idea before, this workshop is ideal to introduce you to the pre-start-up and start-up processes and principles that are vital to the establishment of long-term success and sustainability in entrepreneurship. Critical skills, such as the content, strategies and processes of entrepreneurship, creativity, innovation and opportunity recognition, as well as an introduction to basic business skills, are included in this workshop.

See also: Financial Management and Taxation

Starting My Business

The Starting My Business short course equips you with the necessary skills to start a business that is aligned with your passion and drive to get a successful start-up off the ground by introducing you to the concepts and principles of entrepreneurship and small business management. The course follows a very practical, opportunity-driven and flexible methodology in order to encourage you to participate and engage in the learning experience by exposing you to different case studies, examples and real-life applications. Presented by highly-skilled and international experts in the field of entrepreneurship, the course focuses on starting your business successfully.

See also: Financial Management and Taxation
Growing My Business

The Growing My Business short course focuses on the growth phase of a recent start-up or small business and encapsulates innovation as a core driver of growth. The course will assist you in establishing new, high-flying business endeavours that will make a significant difference in your immediate market environment with the eventual aim to get a bigger slice of the market share. The course is presented on a more advanced level of strategic thinking and application, but caters for small business owners and entrepreneurs in all branches of industry who need to look at reshaping their businesses for profitable growth.

Managing My Business

The Managing My Business short course is essentially designed to directly address the critical business management component of start-ups or small businesses. The course provides you with an extremely practical and outcomes-based training experience to develop and/or enhance your managerial skills further, by specifically focusing on optimising business management techniques, processes and procedures. The course also looks into the operational aspects of running a small business venture on a day-to-day basis by employing real-life case studies, business management objectives and strategic thinking methods for the successful and effective delivery of products and/or services to your business’s market segment.

Starting My Agri-Business

The Starting My Agri-Business short course provides you with a dynamic, high-impact and technology-driven skills training intervention aimed at small agri-business owners by helping you to add real value to the southern African entrepreneurial ecosystem and agricultural landscape. The synergetic training process that forms part of this course creates the perfect pipeline for agricultural enterprise development by focusing on how to identify and develop a good agri-business idea, perform viability studies for sustainability, draft a basic agri-business plan, as well as exhibiting and developing the skills and knowledge base needed to establishing a new business by setting your own agri-scene. See also: Agriculture and Food Security

The Technology Entrepreneurship Development Course is driven by the strategic intent of the small business development environment in support of ongoing efforts to encourage and develop entrepreneurship and small enterprise development in South Africa. The course is largely based on the notion that the small, micro and medium enterprise (SMME) sector is not only crucial on an economic growth level, but is also paramount in integrating and incorporating the successful performance of SMMEs in a technology-enabling environment. This course provides you with such an environment in order to plan, engage and grow your business with ease in a user-friendly system.
We deploy multifaceted teams of experts that provide customised and innovative research and advisory services for a competitive edge shaped around our ability to put science into practice.
