

Information Security Management

Presented by the Department of Computer Science, University of Pretoria

The **Information Security Management** short course provides you with a knowledge of requisite security management actions in the implementation and maintenance of processes, procedures and other issues of corporate governance. The course delves into the identification of information security needs and the implementation of strategies by means of an Information Security Architecture (ISA), and looks at all factors involved, including financial risk auditing, the assessment of current controls, the human side of information security management, as well as the alignment of controls to meet the requirements of your organisation. You will also gain insights to various international standards and guidelines.

Course content

- Introduction to information security management
- Corporate governance and policies
- Security culture, awareness, training and ethics
- Information security architecture
