

BEING 'FUTURE-FIT' FOR THE EMERGING WORLD OF TOMORROW

Whilst we acknowledge the various debates and discussions regarding the Fourth Industrial Revolution (4IR), we believe it is time to bring the topic closer to home by making it responsive to your organisation.

What disruptors (technologies) in 4IR could potentially impact your organisation and the magnitude thereof? Let us assist you with practical ways in which your organisation and its stakeholders can better prepare, adapt to or mitigate the effects of 4IR on your business.

ANALYTICAL PERSPECTIVE

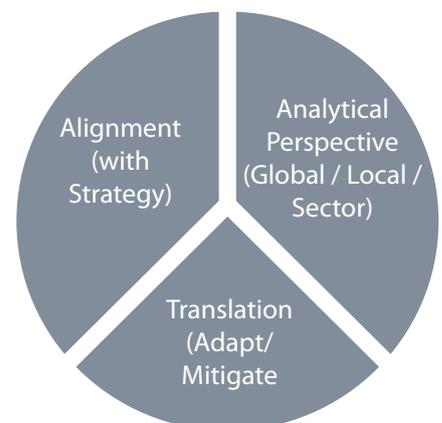

Creating a universal view of the 4IR that encompasses a global, local and sector perspective applicable to your specific industry.

TRANSLATION

Once such a perspective is generated, we will be able to identify and translate the impact of those components of 4IR applicable to your organisation, assisting with strategy development for the future.

ALIGNMENT

This could imply a complete re-alignment of your organisation's strategy, operations, workforce configuration and skills requirements.

NEXT PAGE

Shifting knowledge to insight

Complimentary to the above, we can also support your organisation in the following areas of Human Capital Management and Development:

- Future-fit leadership
- Change management perspectives required to become future-fit
- Being future-fit for the emerging world of work of tomorrow
 - An executive level orientation – 3 hour session wherein knowledge is shared as to what are the critical success factors for being future-fit
 - Conduct an on-site readiness assessment (5 day intervention) determining your status of being future-fit
- Skills Auditing
 - Compile competency profiles for relevant jobs and determine each incumbent’s competency profile via a 180 or 360 degree methodology

VALUE PROPOSITION

Enterprises University of Pretoria has the ability to provide business-to-business solutions across the full life cycle of services from project conceptualisation to delivery and capacity building using scientific evidence as basis. Our industry experts and specialists will bring independent opinions to the table relating to aspects such as forecasting, knowledge management, analysing of data and the auditing of skills. These insights will prompt an audit of available skills against what the future requires, enabling organisations to prepare accordingly to fill the gaps.

COMPANY PROFILE
